## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 25 June 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) 11-16 is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-10 and 17-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

**DETAILED ACTION**

***Election/Restrictions***

Claims 11-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The passage "clasp at one about the midpoint" does not particularly point out applicant's device because "at one about" is unclear.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Robinson (US 5,443,155).

Robinson (figures 8 and 9) teaches coiled tooth strap structure which is coiled and in a package. Figure 8 shows the two coiled strap version and figure 9 shows the single coiled strap version.

Claim 17 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Parsons (US 5,669,110).

Parsons (figure 2) teaches single toothed strap restraint structure which is folded. However, folded is a form of sinusoidal planar coils<sup>1</sup>.

Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Burkholder (US 5,088,158).

Burkholder (figure 5) teaches double toothed strap restraint structure which is folded. However, folded is a form of sinusoidal planar coils<sup>1</sup>.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peden (US 5,469,813) in view of Robinson (US 5,443,155) and Arthur (US 1,797,539).

Peden (figures 1-4) teaches coiling a normally flaccid flat strap into a storage condition. The difference is that it isn't a toothed socket clasp and it isn't secured by a band. However, Robinson (figures 8, 9) teaches coiled tooth strap structure used as a

restraint which is coiled and in a package. Figure 8 shows the two coiled strap version and figure 9 shows the single coiled strap version. Further, Arthur (figures 1 and 2) teaches the use of a rubber band to hold the coiled film together. Arthur's teaching is an example of the well known use of banding devices. It would have been obvious to modify the teachings of Peden to select a toothed strap to coil in view of Robinson teaching that it is well known to package coiled toothed restraints and to use a binding device rather than the kit of Robinson would have been obvious in view of Arthur teaching the well known use of rubber bands for securing coiled material.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents of Fast (US 5,167,086), Miller (US 5,581,853), Hoisington (US 5,291,765), Tugwood et al. (US 4,479,785), De Michieli (US 4,024,736), and Spiropoulos (US 6,026,661) teach pertinent fastener structure.
